

In the pursuit of equality and diversity in career development, the Erasmus+ KA2, GUIDE Project takes a step forward, addressing the persistent barriers that hinder equal opportunities in the professional realm.

Focused on gender and career development, the project emphasizes the need for Career Guidance Professionals (CGPs) to adopt a gender-sensitive approach, steering clear of stereotypes that limit choices and perpetuate inequality.

What's new?

Have you visited the Digital Tool for identifying stereotypes in career decisions?

This digital tool is designed to help professionals with career guidance responsibilities, such as career counsellors, teachers, advisors, and others, in uncovering and recognizing gender stereotypes and obstacles that all genders may face and impact their professional career decisions.

You can also find the user guide available in all languages

The tool is available in English, Danish, Greek, German, Dutch, Spanish, Portuguese, and Slovenian.

After the completion and the release of the Digital Tool for identifying stereotypes in career decisions, partners held Open Events in their countries!

We met in Leipzig!

On 22 and 23 May 2024, the GUIDE project partnership met in Leipzig, Germany, for the 3rd transnational meeting. 14 representatives joined by the nine (9) project partners, from Greece, Denmark, Germany, Cyprus, Spain, Slovenia, Portugal, and the Netherlands.

This meeting marked a significant milestone, as we are halfway through our project journey. Over the two days, we engaged in fruitful discussions about our progress, the completed project results, and our next steps.

The meeting featured several key presentations by all partners. The meeting was exceptionally productive, providing us with renewed momentum to drive the successful completion of the GUIDE project.

After this meeting, partners created and currently released the Digital Tool for Career Decision-Making Styles.

This digital tool is designed to assess an individual's approach to making career decisions, known as Career Decision-Making Styles, and explore how stereotypes may impact their decision-making style.

Partners created the co-creation model to assist professionals during their counselling sessions with the individuals.

Gender Sensitive Career Guidance Toolkit

This toolkit is intended to assist professionals in career guidance in addressing issues of gender stereotypes and equality. It provides a comprehensive, step-by-step guide to enhance gender-sensitive career guidance in higher education institutions, training providers, organisations, and for professionals in career guidance.

What to expect in the next newsletter?

We are now developing the Online Training Platform!

This online training program is designed to enhance the skills of professionals and teachers in career guidance. The goal is to help them recognise gender stereotypes and use gender-sensitive techniques and tools to guide individuals of all genders in choosing their career paths.

Stay tuned!
